

WHY INTELLITRACKER

The significant rise in dropouts in academic and professional education institutions is one of the primary problems faced by the current society at large. The first sign of someone dropping out is the chronic absence, and most institutions are not able to identify this issue within the required time due to poor attendance tracking systems that does not provide accurate data and lack of robust tools.

The attendance level of a learner provides a number of analysis options which can ensure that if they are facing any sort of difficulty, then they can be provided with the necessary resources. These difficulties can be anything that results in a drop-in attendance leading to degradation of academic performance. Certain studies even state that fall in academic attendance can be linked to juvenile crimes and troubled future.

INTELLITRACKER SOLUTION PROVIDES A FRICTIONLESS EXPERIENCE WHEN COLLECTING ATTENDANCE, EITHER IN CLASSROOMS OR IN EVENTS, ELIMINATING THE TEDIOUS INACCURATE MANUAL ATTENDANCE COLLECTION TASK.

THE SOLUTION

The solution here lies largely in the hands of the academic institutions when equipped with the right tools.

Whether it is for K12 schools, Higher Ed institutions, or even for Pro Ed institutes, a closer watch on the learners and constant monitoring of their activities can allow for a much better character judgement and thereby allow one to notice the early signs of delinquency.

Modern technology appears as a saviour in such a situation. With the help of the latest apps and software, institutions can keep a much better and up to date record on the activities of their learners including attendance.

- ✓ Simplify attendance collection in physical classrooms, Labs, Conference rooms, transportation vehicles and stadiums
- ✓ Uses secured NFC technology to prevent duplications and card copying
- ✓ Instant Notification System
- ✓ Robust and Customizable Dashboards
- ✓ Engage families and advisors
- ✓ Extensive and Detailed Live Reports

USE CASES

Automate tracking learners' day to day classroom attendance

Monitor Labs' usage for security purposes

Quickly and easily validate students' IDs attending exams

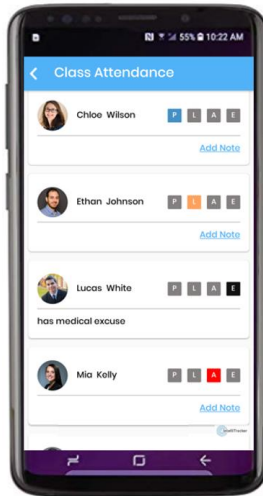

Monitor transportation vehicles usage

Enhance security and create a safe environment

Access live attendance reports for outdoor activities

Track conferences and seminars attendance for recognition

Monitor students' absences to identify troubled students

BENEFITS

Overall increment in academic success rate.

Enhances students' retention with early intervention

Increase individual academic engagement and performance.

Early identification of troubled learners

Easy maintain of attendance records and absence tracking system to ensure that required study material is not missed out on.

Provide parents the right tools to help their kids stay on track

Integrates the institution's and government's attendance policies.

Visa compliance monitoring facilities

Source of truth for absence records in front of legal entities

TECHNICAL CHARACTERISTICS

Fast deployment

Easy to use UI and dashboards.

Simple check-in options for learners and educators using their NFC enabled ID cards

None or minimal class disruption in collecting attendance.

One click tracking option for learners and educators.

Integrate with 3rd party vendors' solutions to sync attendance data

Hosted on a secured, reliable and scalable SaaS platform.

Native mobile apps are available on approved iOS and Android devices

24x7 dedicated support team

Integrates the institution's and government's attendance policies.

Visa compliance monitoring facilities

Source of truth for absence records in front of legal entities
